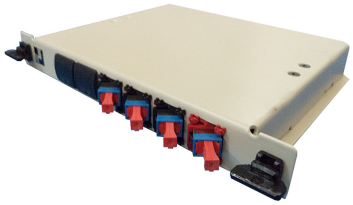
FDF-FL2-SPLTR-MODULES

Base Product



FDF/FL2 VAM Fiber Optic Splitter Module

CommScope's Value-Added Module (VAM) system adds flexibility and functionality to the optical transport system by enabling service providers to easily incorporate optical components into the network. This versatile platform lays the foundation for the optical network of the future.

CommScope's VAM Modules feature:

- Enclosed Plug-in modules protect the optical components from physical and environmental damage
- Angled retainers maintain minimum bend radius of fiber patch cords
- Pluggable modules can be added or removed from the chassis without interfering with existing terminated patch cords
- Flexible platform: modules can be created for new applications quickly and easily to meet customer requirements
- Custom configurations are available upon request

The FDF VAM Splitter system consists of a variety of optical component modules that fit into the FDF ODF VAM chassis.

Splitter applications include:

- Signal Splitting, distributingsignals to multiple subscribers
- Monitor Testing, troubleshooting networks or monitor traffic without forcing disruption of service

Product Classification

Regional Availability	Asia | Australia/New Zealand | EMEA | Latin America | North America
Portfolio	CommScope®
Product Type	Splitter module
Product Series	FDF | FL2000

General Specifications

Device Type	Standard VAM
Functionality	Splitting
Access	Front
Application	For use with FDF frames | For use with FL2 panels

FDF-FL2-SPLTR-MODULES

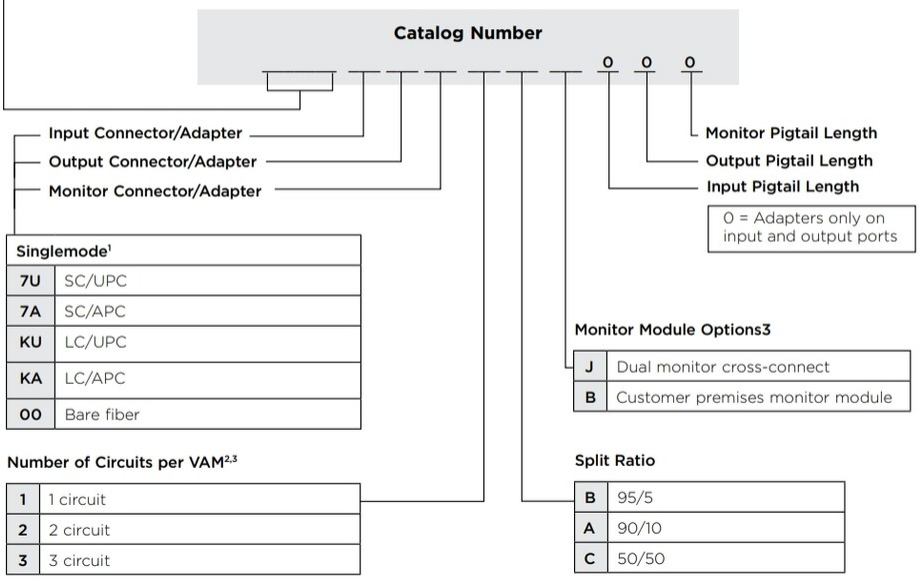
VMMW-	Module for FCM optical distribution frames with WideVAM® chassis
VMM-	Module for FCM and FL2000 optical distribution frames with standard VAM chassis



Singlemode[1]	
7U	SC/UPC
7A	SC/APC
KU	LC/UPC
KA	LC/APC
00	Bare fiber

Monitor Module Options3

J	Dual monitor cross-connect
B	Customer premises monitor module

Number of Circuits per VAM[2,3]

1	1 circuit
2	2 circuit
3	3 circuit

Split Ratio

B	95/5
A	90/10
C	50/50
