

ALL-IN-ONE-CABINET

Base Product

All-In-One FLX Integrated PON Cabinet

- Supports DWDM and CWDM passive modules

Introducing the CommScope All-In-One FLX integrated PON cabinet: The complete, flexible solution

Utilizing an All-In-One (AIO) cabinet, customers eliminate the need for multiple separate active and passive cabinets. Merging Outside Wireless Network and Fiber Distribution Hub technology, this dense AIO provides an integrated solution specifically designed for OSP edge of network deployment. Built to facilitate 100km backhaul and 20km extended Remote OLT PON customer reach when CO is not present. With both MSO and Telco OLT styled variants (node & shelf OLTs), we've built-in our swing framed fiber distribution hub technology (FDH), and value-added modules such as optical splitters and DWDM devices for simultaneous deployment. Meanwhile, the interior offers ample space for customizable power management, GR-487 compliant cabinet temperature control, battery backup, rectifiers, and more.

MSO All-In-One FLX PON Cabinet

The MSO AIO could support up to 1,536 subscribers via multi-stage split using Hardened Nodes such as the CommScope NH4000 /NH4600 VHUB for 10gig EPON usage. Each AIO cabinet can carry 2 Hardened Nodes such as the CommScope VHUB. Each VHUB can support up to 3 PON modules which then provide 2 PON Ports/Service Groups each. Next, each PON Port/SG could then support up to a 1x128 split. Thus, 2 (VHUBs) x 3 (PON Modules) x 2 (PON Ports/SGs) x 128 (split) = 1,536 potential 10gig EPON edge of network subscriber support via a variety of FTTH distribution split architectures such as centralized, distributed/cascaded, and TAP.

- 1,536 subscriber potential (10gig EPON)
- Base cabinet is 48 in tall/ 21 RU meeting most municipality height requirements while providing maximum interior capacity
- 1,500W thermosiphon's ability provides built-in temperature control which is GR-487-compliant
- Less than 60 decibels of noise for low sound level
- Supports LGX mounted DWDM and CWDM passive optical modules (Hub-Collapse Capabilities)
- Mounts up to 24 LGX optical splitter modules with 1:2, 2:2 1:4, 1:8, 1:16, 1:32 and 1:64 configurations
- Pre-loaded with 2, 4, or 8 double-wide LGX bracket mounted 1x64 mini PNP LC/APC splitters
- Distribution field terminates 144, 288, or 576 fibers on LC/APC connectors on 144-fiber or 288-fiber distribution cable assembly stubbed arrangements
- Feeder field terminates 24 or 48 fibers on LC/APC connectors on 24-fiber or 48-fiber cable stub
- Cable stub length 100' standard via Dry Armored Loose Tube cable

Telco All-In-One FLX PON Cabinet

Currently in NPI status, the Telco AIO could support up to 8,192 additional edge of network subscribers via multi-stage split using customer configured XGS-PON OLT shelving. Each cabinet can support up to 13RU via 19" or 23" racks for customer specific configuration. Configurations could support customer provided modular shelving which might provide up to 8 slots for OLT cards. Each OLT card could then support 16 PON Ports/Service Groups. Next, each PON Port/SG could then support up to a 1x64 split. Thus, 8 (OLT Cards) x 16 (PON Ports/SGs) x 64 (split) = 8,192 potential XGS-PON subscriber edge of network subscriber support. 44 out of a potential 128 PON Ports/SGs could then be accepted for (2xn) split within the AIO FDH sidecar via FDH3000 standard Plug-and-Play (PNP) splitters. Remaining PON Ports/SGs could be patched for multi-stage split.

- 8,192 subscriber potential (XGS-PON)
- Base cabinet is 48 in tall/ 21 RU meeting most municipality height requirements while providing maximum interior capacity
- 2,000W DC HVAC ability provides built-in cooling which is GR-487-compliant
- Less than 60 decibels of noise for low sound level

ALL-IN-ONE-CABINET

- Salable with or without 2RU -48VDC/200 Amp DC ELTEK Rectifier/Power Plant
- Supports PNP FDH3000 mounted DWDM and CWDM passive optical modules
- Mounts up to 22 PNP optical splitter modules with 44 available splitter inputs
- Distribution field terminates 144 or 288 fibers on SC/APC connectors on 144-fiber or 288-fiber distribution cable stubs
- Cable stub length 100' standard via Dry Armored or Dielectric Loose Tube cable

Product Classification

Regional Availability	North America
Portfolio	CommScope®
Product Type	Fiber PON cabinet
Product Brand	CommScope FLX™
Product Series	FLX
Warranty	Two years

General Specifications

Acoustic Level, maximum	60 dB
Alarm Type	Door alarm
Auxiliary Power Input	Yes
Cable Type	Armored - Single Loose Tube
Color	Light Gray (RAL 7035)
Interior LED light	Both chambers
Interface, Input	LC
Interface Feature, Input	APC
Lock Type	Padlock ready
Mounting	Handhole Pad
Node Storage Capacity	2
Rack Storage	13RU (19 in)
Splitter Type	1 x 64
Heat Management	1,500 W Thermosiphon

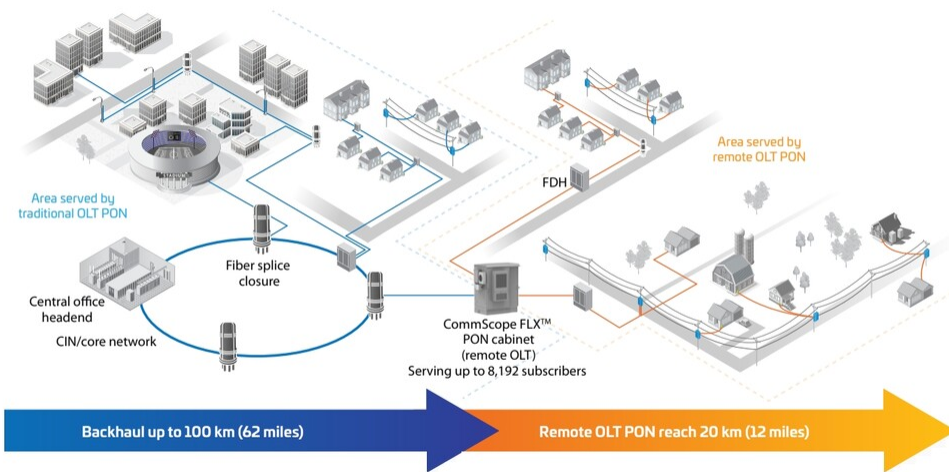

Dimensions

Height	1216 mm 47.874 in
Width	1224 mm 48.189 in
Depth	697 mm 27.441 in
Cable Length	30.48 m 100 ft

ALL-IN-ONE-CABINET

Enclosure Size Large
