

FFT-Q | FFT*-*Q Series Full-Feature Equalizable Taps

1.2 GHz Full-Feature Equalizable Taps

- Support DOCSIS® 3.1 expanded bandwidth up to 1218 MHz
- Improve network performance with signal conditioning plug-ins
- High quality RF connection with auto-seize F-connectors
- Maintain existing install base with compatibility back to "F" series FFT housings
- High level of network resilience with 6kV surge resistance on feederline and F-ports
- Maintain RF and AC connections with faceplate removed with integrated bypass capability

The ARRIS FFT-Q 1.2 GHz series equalizable taps offer improved return path performance for advanced two-way HFC systems while maintaining backward compatibility with previous FFT install base. FFT taps allow for signal conditioning with optional plug-in, field configurable modules that include cable equalizers, return path attenuators, and cable simulators. These plug-ins allow for drop signal conditioning without affecting the main feederline path.
