2022 | Sales by Segment

\$9.23B total 2022 sales

OWN brands include:

- **Mosaic®** antenna platform combines passive and active to smooth 5G network growth—[learn more](#)
- **HELIAX®** portfolio of easy-installing, TCO-lowering RF cabling and connector solutions—[learn more](#)
- **ValuLine®** microwave antennas that combine high capacity and economical operation—[learn more](#)
- **PowerShift®** intelligent power delivery for macro and small cell networks—[learn more](#)
- **PIM-Guard™ PIM** mitigating cable management system featuring SnapTak™ hangers—[learn more](#)

Simplify and innovate everywhere it matters

CommScope OWN is one of five business segments operated by CommScope. Our mission is to simplify and innovate everywhere it matters to help the mobile ecosystem build today's and tomorrow's sustainable networks—and to do it faster and smarter.

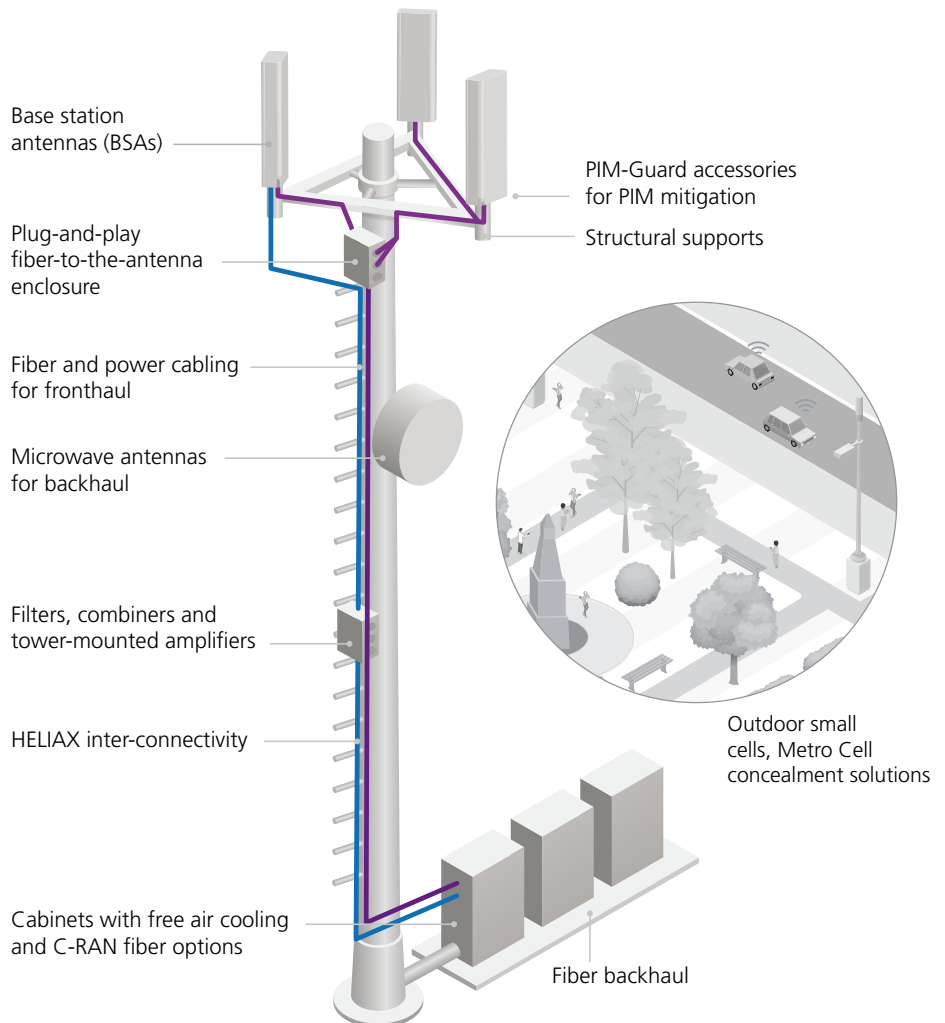

As technologies evolve, standards advance, and demand keeps growing, our commitment to delivering highly customizable, cutting-edge macro cellular and small cell network infrastructure guides our innovation and manufacturing as it has for over 85 years*.

With 5G networks coming into their own, we are already designing for the generations still to come. Our mobile network operator customers can count on CommScope OWN to continue to find better ways to build solutions that connect more people while consuming less to reduce environmental impact.

At OWN we make “everything but the radio” to offer our customers a complete end-to-end RF portfolio that provides CommScope quality and reliability across the RF path.

*Andrew® corporation founded in 1937—acquired by CommScope in 2007

Our partners trust every OWN solution to be three things: **innovative, smart and efficient.**

INNOVATIVE: For more than 85 years, CommScope OWN has pushed the envelope to deliver performance above and beyond anything that conventional thinking could produce. The proof is found in our extensive portfolio—and our vast collection of patents worldwide.

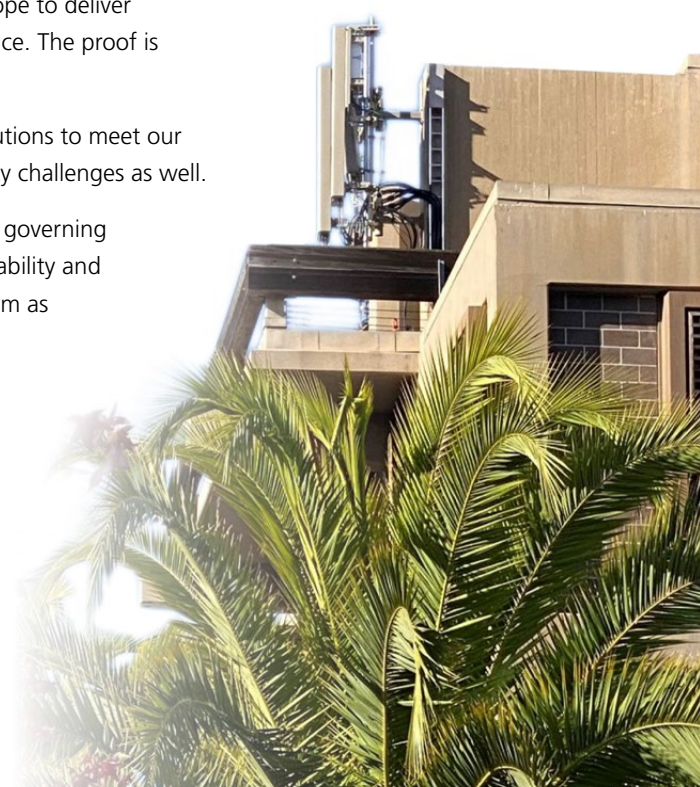

SMART: Our innovation is aimed squarely at providing smarter, customizable solutions to meet our partners' challenges—not just technical challenges, but business and sustainability challenges as well.

EFFICIENT: CommScope OWN is also leading the way with our [Green Agenda](#)—governing how we build, ship and deploy our solutions to enhance energy efficiency, recyclability and product lifecycle expectations. Our partners have goals to meet, and we treat them as seriously as our own.

OWN quantifies these benefits in our Sustainability Value Score (SVScore™), which is our science-based calculation of environmental sustainability of many of our

products across four metrics that cover everything from materials sourcing to performance to shipping logistics. Simplified into a 10-point scale—with 10 being the greatest benefit—OWN's SVScore system makes it easy to see how and where our solutions help network operators make a difference.

1,648
issued patents

1,124
pending patent applications

More than **500** BSA products offered, 100 released in 2022

2.5 M
RF Conditioning pieces of equipment produced in the past 5 years

ADDRESSING THE NEEDS AND CHALLENGES OF THE MOBILE ECOSYSTEM

	SIMPLIFY 5G ROLLOUT	EXPAND NETWORK CAPACITY	BUILD SUSTAINABLE NETWORKS
MAJOR CHALLENGES	<ul style="list-style-type: none"> • Simplification: tower top and connectivity • Future-ready solutions: modular and upgradable • Risk mitigation and performance improvement: reducing PIM, weight and wind load 	<ul style="list-style-type: none"> • Small cell densification • New bands availability • Interoperability 	<ul style="list-style-type: none"> • Intelligent power delivery • Ensure service continuity • Circular economy
OWN: A BROAD PORTFOLIO OF SOLUTIONS	<ul style="list-style-type: none"> • Mosaic BSA platform: active and passive in less space • Radio-agnostic solutions • HELIAX connectivity • PIM-Guard accessories reduce costly PIM 	<ul style="list-style-type: none"> • HELIAX FTTA • Metro Cell concealment solutions for outdoor small cells • Microwave antenna systems 	<ul style="list-style-type: none"> • PowerShift Macro and Metro • Open RAN split architecture • ODM/OEM ecosystem partnerships
