

# VTRANSXKC-6W-6

---

Dual-polarized output transition for HX, USX & SHPX4 antennas, 5.925 - 7.125 GHz, CPR137G flanges

## Product Classification

**Product Type** Output transition kit

## General Specifications

**Polarization** Dual

## Electrical Specifications

**Operating Frequency Band** 5.925 – 7.125 GHz

## Packaging and Weights

**Included** Flange hardware kit | OMT hardware kit | OMT transition

## \* Footnotes

**Operating Frequency Band** Bands correspond with CCIR recommendations or common allocations used throughout the world. Other ranges can be accommodated on special order.
